WOLFRAM

October 2023

Dear Participant,

On behalf of **Wolfram Research**, congratulations on your performance in GPT 3.5 Solve-a-thon! We are pleased to help support this event by providing a year of Wolfram|One Personal Edition and Wolfram|Alpha Pro to everyone in your top teams.

As the creators of Mathematica, Wolfram|Alpha, and the Wolfram plugin for ChatGPT, Wolfram Research is the pioneer of computational intelligence and scientific innovation. Wolfram Language powers intelligent assistants, AI systems, and tools for R&D, education, enterprise and consumer applications. In addition to providing software for more than a generation of scientists and students, Wolfram maintains some of the web's most visited sites for technical information, including the Wolfram Demonstrations Project and Wolfram Community - an online forum for sharing ideas, asking questions, and collaborating with professionals, researchers, and other students across disciplines.

To redeem your Wolfram award please complete the webform here:
http://www.wolfram.com/sponsorshiporderform/

Please use ==zHackGPTSolveAThon1023cs== in the Program Code field on the webform. Access is non-transferable and may only be used by eligible awardees from this hackathon. Awards are limited to one per person. Please note that this offer expires on December 31st 2023 and you must complete the form by that date to receive your free tech.

Want to make the most of Wolfram resources in your next Hackathon? Please visit our Hackathon page:

The Wolfram Summer School for undergrads and up is held annually near Boston MA. Students are each assigned a project and will meet with Stephen Wolfram to discuss project ideas and final project assignments. Projects almost invariably involve computer experiments programmed in the Wolfram Language. At the end of the Summer School, students present their projects individually. Past projects may be viewed here:
